

Heat Tolerant - Drought Tolerant - Fast Establishment

Extending the Adaptation of Kentucky Bluegrass™

Fire and Ice™ Texas Bluegrass Hybrid is a revolutionary development in Turfgrass breeding. This new seeded bluegrass variety actually extends the areas of adaptation for Kentucky Bluegrass, which is to many the most desirable lawn grass.

By intercrossing the heat and drought tolerant features of Texas Bluegrass with the color and texture of Kentucky Bluegrass, homeowners, landscapers and golf courses in the transition zone and south can enjoy the benefits of a Kentucky Bluegrass lawn, which stays green year round under ideal management conditions.
